A trustworthy, client-oriented firm

We put **our clients' needs at the heart of our practice**. Our clients know that they can contact us and that all their questions will be answered quickly. We maintain a personal relationship

with them based on trust and genuine listening. We keep them informed without delay of the progress of their case.

Our advice is transparent and sincere. We never advise our clients to initiate proceedings without real chance of success. We favour the amicable resolution of disputes, whenever possible.

We only intervene before the courts on the basis of a rigorous analysis of the facts and the law. Our cases are methodically prepared and argued with conviction.

A successful business practice

Citizen Avocats is a **firm of entrepreneurs for entrepreneurs**, providing day-to-day support to local economic players in the creation, development and internationalisation of their activities.

We adapt to the pace of business and offer fees adapted to the launch of new businesses. Our aim is always to accompany and assist, never slow down.

Turning to us also means benefiting from **our efficient professional network**. Depending on your needs, we can put you in contact with professionals (accountants, financial advisors, notaries, associations, etc.) whose services are complementary to ours. This is always done in strict compliance with our ethical rules (no conflict of interest, independence, etc.).

A truly international law firm

Founded by an internationalist, our firm is designed and structured to **transcend borders**. Private international law is our area of excellence. Over 70% of our cases are handled in English. We organise daily videoconferences with clients in America, Asia, Africa and Europe...

Every day we assist private Anglo-Saxon clients based in the West of France. They appreciate our knowledge of their culture, our responsiveness and our proximity. Thanks to **our transnational agreement with the English solicitors' firm SO Legal Ltd**, we offer them unique legal services on both sides of the Channel.

A modern and dynamic law firm

Structured as a commercial company, our firm is both **modern and dynamic**. For example, all our e-mails are sent and received via a provider that guarantees encryption and cyber security.

We employ powerful digital resources, which maximise our efficiency.

All our associates, employees and trainees speak several languages and have worked abroad. We care about their personal fulfilment at work. That's why we give them the time and resources they need for training and encourage **collaborative work**.
